

The proposed changes to the "Rules & Regulations Implementing the Telephone Consumer Protection Act in 1991-CG Docket No. 02-278" will greatly restrict our company's ability to operate. The number of jobs lost in our company alone could be hundreds if these changes are made. A city our size cannot afford to lose any more employment opportunities in these struggling economic times. Please reconsider making changes and, instead, concentrate on enforcing the current laws that a few bad teleservice firms in the industry choose not to follow.
